

# MY SCHOOL IS THE BEST

Dear sirs/madams ,

We are from Kauno "Santaros" gymnasium . We are first S class students Rugile and Gabija . We will tell our opinion about schooling system , all tho our opinon might change since we are only going to the school for more than half a year which isn't long .

So in our opinion schooling system is intresting . It's quite diffrent from previuos schools we have been to . It's also really hard to get used to . And the whole schooling process is diffrent , the grading system and test/exam forms are very diffrent . Teachers give less information to write , writing only the main topics of the subject which makes easier to study in some way . Teachers give a lot of projeckts to make , and we learn lesson from textbooks which makes it more intresting and we find more information because we are searching for it on our own , teachers only land us their hand in help.

In conclusion, schools system isn't bad at all .We get more information and knoladge from looking everything ourselves then rather reading the same old textbook over and over again.
